As-Built Outlet Type and Dimensions:

Type: _____ Elevation: _____

Dimensions: _____

	YES	NO
Is the 100 year and 24 hour storm safely discharged?	<input type="checkbox"/>	<input type="checkbox"/>
Are energy dissipators, headwalls and spillways properly constructed and installed according to the plans?	<input type="checkbox"/>	<input type="checkbox"/>
Are embankments and/or excavated slopes stable and covered in a suitable manner as to prevent erosion?	<input type="checkbox"/>	<input type="checkbox"/>
Is the stormwater drainage system (pipes, catch basins, etc...) constructed in accordance with the approved plans?	<input type="checkbox"/>	<input type="checkbox"/>
Has accumulated sediment been removed from the stormwater detention and retention ponds?	<input type="checkbox"/>	<input type="checkbox"/>
Are energy dissipators, drainage structures, and storm lines free of sediment and debris?	<input type="checkbox"/>	<input type="checkbox"/>
Has the disturbed area for the entire site achieved 70% stabilization (permanent ground cover and 70% stable per square yard)?	<input type="checkbox"/>	<input type="checkbox"/>

Post Developed Impervious Area

TMS Number	Impervious Area (acres)	Impervious Area (sq. ft.)

By placing my professional stamp and signature on this paper, I certify that this stormwater management facility and its associated structures are constructed according to the approved design on file with Georgetown County and SCDHEC. I further certify that all the drainage areas designed to drain to this pond in fact do, and the outflow from the pond is equal to or less than maximum allowable for the 2, 10 and 25 year twenty-four hour storm events. I further certify that the copy of stamped calculations attached herto was used to determine the As-Built Storage Volumes, detention of the 2, 10, 25 year twenty-four hour storm events and the required release of the first flush for water quality treatment. For underground detention and water quality management systems, I certify that they were designed and installed per the manufacturer’s recommendations and the approved plans.
